

Abdelrhman Elsaid

Junior .NET Backend Developer

Cairo, Egypt | abdelrhman.ahmed.elsaeed@gmail.com | +201068751057 | [LinkedIn](#) [GitHub](#)

Summary

.NET Backend Developer with hands-on experience building RESTful APIs using C#, ASP.NET Core, and SQL. A structured thinker leveraging Onion Architecture and CQRS to deliver production-ready APIs backed by rigorous unit testing.

Education

Bachelor of Engineering in Electronics and Communications Engineering Mansoura University 2020 – 2025

Activities and Societies:

- **Multimedia Director | Luminous MU:** Recruited 30+ members Jan 2023 – Jul 2024 [Sessions and Workshops](#)
 - **Media Sub-team Leader | IEEE Mansoura:** Led visual assets for 2 major events Jan 2022 – Dec 2023 [Certificate](#)
-

Projects

Backend .NET Developer | Job Simulation Bootcamp (JSB) — Upskilling EG Jan 2026 – April 2026

- **Hotel Reservation System Web API – Booking, Rooms & Reservation Management** May 2026 [Project](#)
 - Tech Stack: ASP.NET Core, EF Core, SQL Server, CQRS/MediatR, AutoMapper, JWT, IMemoryCache
 - Replaced a growing "fat service" layer with CQRS/MediatR handlers, cutting cross-dependencies between reservation, room, and guest logic.
 - Prevented partial-failure bugs in 5+ step reservation workflows by building custom transaction middleware with automatic rollback.
 - Secured the API with JWT, refresh tokens, and custom role-based filters; proved reliability with 82 passing NUnit/Moq/FluentAssertions tests.
 - **Examination System Web API – Automated Online Exams & Grading** Apr 2026 [Project](#)
 - Tech Stack: ASP.NET Core, EF Core, SQL Server, ASP.NET Core Identity, JWT, AutoMapper, FluentValidation.
 - Stopped invalid exam and grading data at the source with a FluentValidation pipeline in front of controllers, instead of scattering checks across services.
 - Built a dynamic exam generator and auto-grading engine that removed manual grading errors for instructors handling large student groups.
 - Enforced role-based access (Admin, Instructor, Student) and traced issues fast with Serilog/Seq logging, verified by 32 passing NUnit/Moq/FluentAssertions tests.
-

Technical Skills

Languages: C#, C++, SQL, SQL Server, HTML.

Frameworks & Libraries: ASP.NET Core, EF Core, ADO.NET, LINQ, MediatR, FluentValidation.

Architecture & Patterns: OOP, SOLID, Design Patterns, Onion Architecture, 3-Tier, Repository Pattern, CQRS, MVC.

Tools & Security: JWT, Refresh Tokens, Role-Based Authorization, NUnit, Moq, Serilog, Seq, GitHub, Postman, Docker.

Certificates

Practical Prompt Engineering [Frontend Masters] [Certificate](#)

Apr 2026

Solid Principles [Programming Advice] [Certificate](#)

Mar 2026

Backend Development, Foundations, Problem Solving (C++&C# & SQL) [Programming Advice] [Certificate](#)

Oct 2025
